ELEVATE PART OF NATIONAL LAUNCH TAKING CLIMATE ACTION WITH GOOGLE NEST RENEW

In Case You Missed It

Chicago – Last month Elevate was part of an exciting news update from Google when the technology firm announced a slate of services as part of their commitment to help people reduce their carbon footprint.

Elevate is partnering with [Nest Renew](#) from Google to make it easy to support a clean energy future right from home.¹ Nest Renew will be rolling out in early preview by invitation later this Fall. As part of Nest Renew's Energy Impact Program, Elevate is one of Impact Partners with community programs supported by Nest Renew that users can direct funds to.

When you join Nest Renew, you'll accumulate Nest Leafs that track your positive impact. As your individual actions to save energy and help the environment grow, you'll reach new milestones allowing you to direct funds to support our community programs.²

"As we transition to a carbon-free electric grid, it will be vital that we collectively support programs helping to build a new equitable energy economy," said Casey Sinnwell, Head of Nest Renew Energy Impact Program.

"Google is honored to be partnering with Elevate, an organization with a deep commitment to energy affordability and centering equity in the climate conversation."

"The climate crisis impacts everyone, and it will take all of us to find solutions," said Anne Evens, CEO of Elevate. "We're thrilled to have this opportunity with Nest Renew to bring health and energy benefits to residents while partnering in a program that lets everyone get involved."

"This technology allows people to make more informed choices about their energy use," said Evens. "It's inviting more people to take part in climate action in their day-to-day activities and make an impact."

Elevate is committed to sharing the benefits of clean energy with the communities that need it most. Another Impact Partner is GRID Alternatives, a frequent collaborator with Elevate on equitable solar installations.

About Elevate: [Elevate](#) is a nonprofit organization that works nationally and is headquartered in Chicago. Elevate designs and implements programs that reduce costs, protect people and the environment, and ensure the benefits of clean and efficient energy use reach those who need them most. Elevate is an expert in water safety and is the administer for LeadCare Illinois, a state-wide lead in water testing program.
